At Spire Healthcare we are committed to delivering excellent individual care and customer service to all our patients, from the time they first get in touch with us until after their treatment is complete. Our dedicated and highly trained people aim to consistently achieve excellent results. For us it’s more than just treating patients, it’s about looking after people.

To see a consultant at Spire Cheshire Hospital:

Call 01925 215 087
Fax 0800 195 3572
Online www.spirehealthcare.com/gpconnect
Email info@spirecheshire.com

If your patient is insured then a referral letter is usually required before your patient can see a consultant. For self-funding patients a GP referral letter is not essential for some specialties. Please contact us for further details.

Insured patients

Scheme/policy details are required at the time of booking so that we can obtain pre-authorisation for treatment.

Self-funding patients

We can provide a tailored fixed price* with no hidden extras on a range of diagnostic tests, treatments and surgical procedures. A GP referral letter isn’t always essential if your patient is funding a consultation themselves. However, if you are referring your patient for self-funding diagnostic investigations they will still need a referral letter. For information call 01925 215 029.

NHS patients

Spire Cheshire is accredited to provide elective surgical services to NHS patients across a range of specialties. Our aim is to make the referral process as quick and easy as possible. You can use the NHS e-Referral system www.ebs.nrcs.nhs.uk to refer your patients to us or alternatively, you can refer by letter or fax (please state that the referral is NHS and provide recent relevant medical history).

Emergency admissions

Outside office hours the senior nurse in charge will assist in helping you to contact a consultant who will make the necessary arrangements for your patient to be admitted under their care. Monday to Friday, 8.30am–5.30pm please call 01925 215 051. At all other times please call 01925 265 000. Ambulance transport is not available. The hospital does not have an accident and emergency department.

Full profiles for each consultant can be found at www.spirecheshire.com

* Please see a copy of Spire’s patient terms and conditions for full detail.

Prices vary per treatment and are dependent on each patient’s individual circumstances and needs.

When is it appropriate to tell your patients about private self-pay treatment?

There are occasions when it is perfectly acceptable to inform or recommend to your patients the option of one-off, self-pay treatment.

- When a patient wants to be seen and treated quickly.
- When a patient is concerned about cleanliness and clinical outcomes.
- When a patient does not meet the criteria for NHS treatment.
- When you and your patient want to choose the consultant they see.

Arranging fast private treatment
Your patient is guaranteed fast access to some of the latest facilities and diagnostic services – usually within a week of referral. If subsequent treatment is required this can usually be completed within a few weeks.

No referral criteria thresholds
Referral into the NHS isn’t always possible. At Spire Healthcare we don’t have referral thresholds – so your patient can quickly access consultant appointments and diagnostic facilities including MRI and CT scans.

Low infection risk
Spire Healthcare was the first private hospital provider to publish clinical performance and patient reported outcomes together on their website, including information on rates of MRSA bacteraemia and Clostridium Difficile infection.
