

Spire

St Anthony's Hospital

About Spire St Anthony's Hospital

- The hospital treats over 6,000 in and day case patients a year
- It employs 350 people
- 170 consultant specialists choose to bring their patients to this hospital

It has recently invested £30 million in new facilities including:

- Six brand new operating theatres
 - Three with laminar air flow systems for joint replacement
 - Including a hybrid theatre with imaging equipment enabling the clinicians to look at live imagery as they operate
- An advanced musculoskeletal suite including the latest gym and rehabilitation equipment
- A new post anaesthetic care unit with eight adult and one dedicated paediatric bay
- New sterile services unit with the latest decontamination unit
- **Dedicated paediatric areas with child friendly services – one of the few private hospitals offering this service between London and the South coast**
- Our new hydrotherapy pool is constantly kept at 34 degrees C to help accelerate rehabilitation following musculoskeletal injuries, sports injuries and orthopaedic surgery

- The hospital offers highly complex and minimally invasive procedures eg Transcatheter Aortic Valve Implantation (TAVI) and Endovascular Stent Repair of Abdominal Aneurysm (EVAR)
- Our Intensive care unit is 24-hour and with eight beds offering support to patients with more complex needs post-surgery
- Our physiotherapy department has an Anti-gravity treadmill which uses technology developed by NASA to unweight the client and enhance our Physiotherapist's ability to help clients recover faster following a lower limb operation or injury
- We also offer physio-led modified pilates classes which involves a system of exercises designed to help improve your posture, strength, flexibility, balance, co-ordination and body awareness

And the investment does not stop here. Later this year there will be:

- A new MRI suite, including provision of cardiac MRI
- Wards refurbishment
- Consulting room refurbishment

Patient satisfaction:

97%

of patients felt they were treated with respect and dignity whilst at the hospital
