# Talking to your patients about private treatment

**When a patient wants to be seen and treated quickly.**

### Arranging fast private treatment

Your patient is guaranteed fast access to some of the latest facilities and diagnostic services – usually within a week of referral. If subsequent treatment is required this can usually be completed within a few weeks.

**When a patient is concerned about cleanliness and clinical outcomes.**

### Low infection risk

Spire Portsmouth Hospital has had no cases of hospital acquired MRSA, MSSA bacteraemia or Clostridium Difficile infection since we opened in 1984.

We have been rated 'Good' by the Care Quality Commission (CQC) following an inspection in April 2016.

#### MRSA bacteraemia rates

**When a patient does not meet the criteria for NHS treatment.**

### No referral criteria thresholds

Referral into the NHS isn't always possible. At Spire Portsmouth Hospital we don't have referral thresholds – so your patient can quickly access consultant appointments and diagnostic facilities including MRI and CT scans.

Visit [www.spirehealthcare.com](http://www.spirehealthcare.com) for more information.

**When you and your patient want to choose the consultant they see.**

### Choose your patient's consultant

Demand the best for your patients and choose the consultant you want them to see. Your patient will see the same consultant at every appointment and they will be in full charge of their care with the support of our 24-hour resident doctor and experienced nursing team.

**When a patient wants to spread the cost.**

### Finance packages

We offer a selection of finance packages enabling self-funding patients to spread the monthly cost for a range of procedures.

### Patient satisfaction survey results.
